Subject: Letter of Recommendation for Chris Kim

To whom it may concern:

I'm pleased to recommend Chris Kim to your company. Over the past three years, my team and I have worked directly with Chris for all our translation projects. We are always confident that we will receive quality work on-time and at a competitive cost, so it has been a pleasure working with him.

The most notable project Chris has worked on is Samsung Engineering's profile and annual report, our most important publication. Although engineering terminology and the industry as a whole is quite complex without an engineering background, Chris delivered superior work that allowed us to move straight into print production after a quick review. Most companies I have worked with involved constant rework and editing, so I am very pleased with the work he has done for us.

I recommend Chris Kim without hesitation and would be happy to continue working with him on future projects.

Sincerely,

Charlotte Lee
Manager of Corporate Communications
